APPWAY ACADEMY

Appway

Practitioner Certification

Exam

90 min

Online quiz

Prerequisites

- Fundamental training
- Basic knowledge of data classes and scripting
- Basic knowledge of document design and generation

Skills

- Ability to create medium-complexity screens
- Ability to deal with PDF and dynamic forms
- Ability to create basic scripts or modify existing ones
- Ability to create/modify basic rules for document generation

Experience

- At least 3 months of project experience with Appway

Goal

Ability to bind fields on forms, develop mapping scripts, define screens with hundreds of fields

Appway™

Professional Business Analyst Certificat.

Exam   120 min

Online quiz

Prerequisites

- Advanced Business Analyst Training
- Process design documentation and tutorials
- Practitioner Certification

Skills

- Good knowledge of best practices around requirements management for an Appway project
- Ability to create process, screen and rule mock-ups with Appway
- Ability to use the process editor advanced modeling features
- Ability to adopt the best practices around collaboration and quality assurance

Experience

- At least 1 year of project experience as Appway Business Analyst

Goal

Ability to manage requirements and to ensure customer success by playing a quality assurance role in the project

Appway

Professional Developer Certification

Exam 120 min

Online quiz

Prerequisites

- Advanced Developer training – all modules
- Diagnosis part from the Advanced Administrator training
- Knowledge of the DataStore extension
- Knowledge of the SOAP and REST extensions
- Practitioner Certification

Skills

- Ability to design processes and data models
- Ability to discuss technical requirements and suggest solutions
- Ability to work with business rules, advanced catalogs and script functions
- Ability to create highly complex screens
- Ability to implement the integration part of a project (possibly based on samples provided by a Master in case of complex integrations)

Experience

- At least 1 year of project experience with Appway
- Process design experience
- Advanced screen design experience
- Integration experience (SOAP and REST extension)

Goal

Ability to discuss a technical solution, implement all complex objects in the project and design the overall process (especially when parallel activities, messages, signals)

APPWAY ACADEMY

Appway

Professional Administrator Certification

Exam   **120 min**

Online quiz

Prerequisites

- Advanced Administrator Training program
- Practitioner Certification

Skills

- Ability to install and configure an Appway server
- Good understanding of the Appway architecture, including deployment capabilities, security model and the versioning
- Ability to execute daily checks on an Appway server
- Ability to react to the most common Appway server incidents
- Ability to perform regular maintenance tasks on the Appway server

Experience

- At least 1 year of experience as an Appway Server Administrator

Goal

Ability to run an Appway environment from the installation phase to the ongoing maintenance phase, taking responsibility for configuration changes, deployments and incident troubleshooting

APPWAY ACADEMY

Appway

Master Certification

📅 Exam   ½ day

Demonstrate experience by presenting projects implemented, remote assessment on a case study by a Master Team

🧰 Prerequisites

- All the technical tracks
- Deep knowledge of all the Appway components
- Knowledge of the SDK
- Knowledge of most of the off-the-shelf extensions (can suggest the adoption of the one best suited for each problem)
- Deep knowledge of the Appway architecture and its different elements (deployment, configuration, integration, performances)
- Practitioner and all Professionals Certifications

Skills

- Ability to design solutions for new problems
- Ability to apply the best combination of business objects and existing parts to solve a specific problem
- Ability to suggest enhancements to the product or design new extensions to bridge gaps in the tool
- Ability to handle the hardest technical questions from architects like challenges on security model, deployment, integration protocols, performance optimization

Experience

- Extensive project experience with Appway (minimum 2 years)

◎ Goal

Ability to solve problems that have not been solved before (as opposed to the Professional who applies patterns learned in other solutions), come up with the right high-level architectural design, handle challenges presented by the client's architects, and ensure that from the project's outset, the route taken is the least painful.
