

Remarks

Release notes with changes since version 6.3.12.

Upgrade notes:

No special actions are required when upgrading from Appway 6.3.12 to 6.3.13.

Appway Platform (Core)

Feature

Area	Importance	Description
Security	Medium	It is now possible to change the KeyStore and TrustStore passwords periodically according to your needs (password policies etc.).
User Service	Low	User Predicate: Filtering by first name and last name is now supported.
Workspace	Low	Validators of the type "mandatory" can now treat entered white spaces as if there was no input entered. Set the new configuration property 'nm.workspace.validation.mandatory.ignoreWhiteSpacesAsInput' to true. Default value: false.

Change

Area	Importance	Description
Cluster	Low	To improve performance and stability, the "Workitems" tab now fetches process tokens in a distributed manner.

Appway Extensions

Feature

Area	Importance	Description
Extension	Low	Components Extension 6.3.15: <ul style="list-style-type: none">- Feature: Adaptive Flow Layout: Added the "Activate adaptive behaviour" check-box allowing you to deactivate the adaptive behavior. The check-box is selected by default.- Change: ToggleVisibilityArea: The toggle visibility area now remembers the visibility state after a reload screen action.- Change: Viewport Component : Improved description labels.- Bugfix: Adaptive Flow Layout: Nested Adaptive Flow Layouts no longer overlap their children when rendering.
Extension	Low	Money Extension 1.4.0: <ul style="list-style-type: none">- Feature: Added the "onchange" action to the Money Field and Currency Selector components.

Change

Area	Importance	Description
Extension	Low	Deployment Extension 8.0: <ul style="list-style-type: none">- Change: Updated the export file to accommodate changes in the extension functions. <p>Note: Version 8.0 of the DeploymentExtension is compatible with Appway version 6.3.12 and higher.</p>

Bugfix

Area	Importance	Description
Extension	Low	PortalWorkList Extension 5.0.4: <ul style="list-style-type: none">- Bugfix: Fixed an issue where the worklistId could not be set as a variable.- Bugfix: Fixed an issue where attribute names of custom columns could not be set as

		variables.
Extension	Low	ProcessMigration Extension 2.0.1: - Bugfix: Absolute paths are now always used for HTTP redirects in the user interface.
