

#### Remarks

Release notes with changes since version 6.2.6.

#### Upgrade Notes:

No special actions are required when upgrading from Appway 6.2.6 to 6.2.7.

## Appway Platform (Core)

### Change

Area	Importance	Description
Studio	Low	Library: Appway no longer allows business object IDs to start with a hyphen. This has been possible in previous versions but has led to many errors in the studio.

### Bugfix

Area	Importance	Description
Data Table	Low	Added missing null pointer checks. Errors like "Exception evaluating method com.nm.datatable.DataColumnComponent.isFilterPrecisionPossible(0)" will not happen anymore.
Web Application	Low	The login page is no longer forced to be loaded in the topmost frame of the window.
