

Remarks

Release notes with changes since version 5.3.14.

Upgrade Notes:

No special actions are required when upgrading from Appway 5.3.14 to 5.3.15.

Appway Platform (Core)

Change

Area	Importance	Description
DataTable	Low	The data table source "Custom Model" is now deprecated.

Bugfix

Area	Importance	Description
Refactoring	Low	Refactoring a Document or Document Set ID did not refactor the Label containing its title.
Refactoring	Low	Refactoring of a resource's ID failed if that resource was referenced from another resource (e.g. a CSS with an import URL to another CSS).
Script Language	Low	Method "moveElement(...)" in class "DataArray" invoked the callback method "entryMoved(...)" on the change listeners with wrong from-index, which is now fixed. This is mainly relevant for the DataAuditTrail extension which uses this callback to remember when an element is moved in an indexed collection.
Security	Low	Fix cross-site scripting issue in built-in error page.
