Release Notes 5.3.8 - Patch Release | 05.02.2014

Remarks
Release notes with changes since version 5.3.7.

Upgrade Notes:
No special actions are required when upgrading from Appway 5.3.7 to 5.3.8.

Appway Platform (Core)

Change

Area	Importance	Description
Studio	Low	Business Object Editors: When using the filter of the library, the result list will now automatically switch to a non-tabbed flat list. This will make it easier to find the desired components.

Bugfix

Area	Importance	Description
DataTable	Low	When using labels for the configuration of a column filter or a cell editor, the used labels will now get translated as well.
Integration Link	Medium	The script language function "CallIntegrationLink" and process task "Integration Link" did not pass the optional version filter with the correct map-key.
PDF Output Table Editor	Low	Cell alignment option "justified" on cell layout was missing in the editor.
Screen Components	Low	Border Layout Manager: Dynamic expressions will now get evaluated correctly.
Screen Components	Medium	Dropdown List: A Dropdown List with multiple selections did not show selections after reloading a screen.
Screen Components	Medium	Dropdown List: The component now works as expected when multi-selection is enabled and all values are removed by the user.
Screen Components	Medium	Dropdown List: Updated select2 library to latest release 3.4.5. This fixes a bug that caused some versions of IE to escape certain characters wrongly in specific situations.
Script Language	Medium	Function "SORT": Sorting collections with 2 elements did not work.
Studio	Low	Console: Flows: If there is not enough space, scrollbars will appear again.
Web Application	High	IBM WebSphere 8: CharReponseWrapper: Overwritten the flushBuffer() method to prevent WAS8 flushing the output before setting response headers.
